President/CEO Message

Hi I Mehmet AVCI. I assume the role of President / CEO of the well-established, corporate WILCO GROUP.

We continue to contribute to the world and increase the efficiency of our work and service areas with our experience of over thirty years.

We are the closest followers of the technology that changes living and working standards in the world in the sectors we serve.

Our priority is always living things and then the non-living values and spaces that give meaning to institutions and make them productive. The test for which we are constantly preparing is the sustainability of the reflection of the institutions' will on the natural environment.

For this reason, our group protects the values it has acquired as its corporate identity with recycling, carbon footprint and sustainability policies.

We aim for future generations to have a cleaner, more natural and livable world.

Wilco About Us

WILCO GROUP is a well-established business.

WILCO, whose foundations were laid in 1991, today provides services in 81 provinces and 14,000 points. In this respect, it is the leading company in its sector with the widest service network in Turkey.

Operating mainly in the cleaning and hygiene industry, WILCO GROUP leads the industry in increasing quality standards. WILCO, which brings the new trends in the world to our country, is a strong corporate group company in office cleaning, public transportation cleaning, shopping mall cleaning, hospital cleaning and hygiene, school cleaning, solid waste collection, recycling and general cleaning of open areas. And we know our responsibilities, and we do our job meticulously from day one. We constantly maintain our high service quality. By investing in research and development, we also lead social responsibility projects that protect our country and our world.

For all these reasons, we are establishing cooperation and business partnerships with the same quality of responsibility and in the same corporate universe as our country's deep-rooted domestic investments and global investments.

As WILCO GROUP, we always protect the trust placed in us with dignity. This natural and clean world belongs to all of us and our future. We are here, we are with you.

Vision And Mission

Our Vision.

To provide the most healthy, safe, clean and hygienic working and service areas.

Our Mission.

To create a livable, clean and safe world by providing the most accessible, efficient and healthy working and service areas.

Our Policies

Our Policies

Sustainability.

He was first introduced to the concept of sustainability in 1987, thanks to the World Commission on Environment and Development. Subsequently, it began to be remembered with a holistic approach covering ecological, economic and social dimensions, shaped by the decisions taken by countries to solve the problems of the planet and the reports published.

What is meant in the essence of the concept; It is the ability to provide a self-renewing natural environment, social conditions based on equality and prosperity, and an economic system without leaving anyone behind.

The main purpose here is the responsibility of leaving a world that is livable in every respect to future generations.

Wilco Group we are advocates and implementers of sustainability sensitivities.

Our Policies

Recycle.

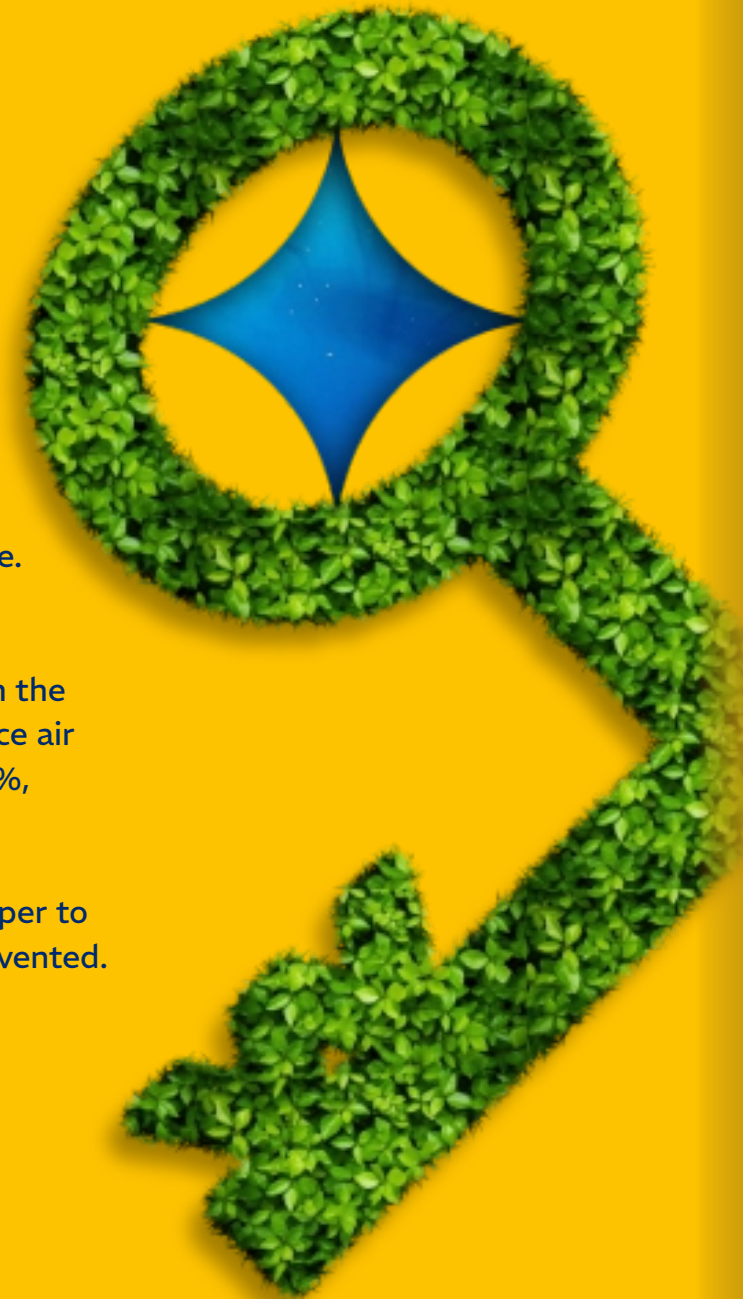

It is to protect the main raw material and prevent the energy expenses spent in production by making the parts of the materials used that are out of use available to be consumed in the existing product or similar non-product products. By reintroducing consumed materials into the recycling ring, the need for raw materials decreases. In this way, increasing consumption in parallel with the increase in human population is prevented from disrupting the natural balance and causing damage to nature.

Reusing used paper or those produced from the same tree in paper manufacturing can reduce air pollution by 74-94%, water pollution by 35%, and water use by 45%.

For example, by adding one ton of waste paper to paper pulp, cutting down 8 trees can be prevented.

As WILCO GROUP, we are an organization that moves forward with the same advocates in the separation and reuse of all used products, purchasing policy and cooperation policy.

Our Policies

Carbon Footprint.

Carbon footprint is a measure of the damage caused by human activities to the environment in terms of the amount of greenhouse gases produced, measured in units of carbon dioxide, and consists of two main parts: direct footprint and indirect footprint.

The primary footprint is a measure of the direct CO2 emissions that arise from the burning of fossil fuels, including domestic energy consumption and transportation, while the secondary footprint is a measure of the indirect CO2 emissions of the products we use, which are related to the manufacturing and eventual degradation of these products, from the entire life cycle of the products we use.

Wilco Group we support the fight against carbon footprint with our action plans and the protective practices and working procedures we carry out with our business partners.

Bank Cleaning

In bank cleaning services, as in office and workplace cleaning, one of the important issues is not to disturb bank employees and customers during cleaning. Security is of particular importance in bank cleaning since your bank has special equipment and internal equipment specific to the bank structure. For this reason, the reliability of the cleaning personnel who will be responsible for cleaning the bank branch must be ensured and they must have worked in the field of cleaning for a long time and have experience. It is to provide you with a clean and hygienic environment by cleaning with cloth and bucket colors according to the color codes specified according to the areas of use, preventing cross microbes, and carrying out the cleaning work perfectly and completely. In bank cleanings, final checks are made by the bank official and the company official, and the work is delivered with the signed minutes.

School Cleaning

We have determined that school cleaning in Turkey is done unconsciously and that there are no standards. We bring a new dimension to the school cleaning industry in Turkey with the School cleaning system we developed in our own R&D department...

As we know, schools are the areas where infectious diseases spread the most. For this reason, school cleanliness is very important both in terms of providing education in healthy environments and protecting public health.

Airport Cleaning

We are aware of the impact of airports on the image of a city and even a country, and how important clean and hygienic airports are in ensuring that our arriving or transiting guests have positive thoughts about our country.

Cleanliness plays a major role in the quality of service provided to both domestic and international passengers. WILCO provides airport cleaning services with its expert staff.

Bellows, gates, counters, luggage belts, stairs, elevators, x-ray devices, VIP, CIP, cafeterias, parking lots, offices, glass surfaces, hard surfaces and other floors, etc. Our services include special cleaning procedures for all special areas and electronic/mechanical systems.

Hospital Cleaning

In hospital cleaning services, in order to prevent infections that may arise from the hospital environment and to create a healthy environment for patients, patient relatives and hospital employees, by following the specified cleaning rules, with the cleaning project we have developed as a special care and cleaning system for health, schools and public institutions, cross-sectional We provide you with a clean and hygienic environment by preventing microbes.

Factory Cleaning

In terms of production activities, factories are production facilities equipped with various machines and where many people work in shifts. In this regard, factories, which are an environment where many machines work continuously, are places where many people breathe and work in production activities during working hours. Therefore, in addition to the pollution caused by the machines, factories also become heavily polluted during the day due to the garbage produced by the people working in them.

Factory cleaning is a job that requires a lot of professionalism. In addition, factory cleaning is a job that must be done meticulously as it directly concerns the health of the people working in the factory. Factory cleaning, especially for the floors and material areas in factories, must be done with previously tested TSE appropriate chemicals and combined floor washing automats that are effective in cleaning, and to provide you with a clean and hygienic environment by performing the cleaning work perfectly and completely.

City Cleanup

We carefully transport the solid waste found in the streets and avenues with our vehicles to the garbage dumps or temporary storage areas designated by the municipalities. Garbage is collected by staff at certain times, according to a prepared schedule.

The necessary training is given to the personnel working in the collection, transportation and storage of solid waste by occupational safety experts, environmental engineers and company officials, and the damage that may be caused to the environment is minimized.

Exterior Cleaning

With our experience and knowledge in exterior glass cleaning, we are ready for your exterior glass cleaning job with our expert teams. By prioritizing the safety of our staff, we safely offer you exterior glass cleaning service with our certified staff in accordance with the Occupational Health and Safety law, with a quality service approach.

When cleaning exterior surfaces, metal and glass surfaces should be treated differently and the cleaning chemicals on both surfaces should be unique.

The chemicals used in exterior cleaning works, both for glass and metal cleaning, must be selected from products that have a TSE certificate and have been tested before on the surface. Because incorrectly used chemicals, exterior glass cleaning services do not go beyond an effective and permanent solution, but rather a service that damages the facade; on the contrary, it accelerates corrosion. In line with our research and experience, exterior glass cleaning should be done at least twice a year and protect your building against corrosion.

Public Transport Vehicle Cleaning

Wilco Group introduced the concept of 'hygiene' to public transportation vehicle cleaning in Turkey... By taking a radical decision regarding the cleaning system, we put an end to the classical concept of cleaning and switched to hygienic cleaning, which provides a sterile environment for passengers. Because cleaning the public transportation vehicles that countless people use, breathe, touch and spend time in, with the classical cleaning approach, did not actually provide real cleaning.

In the system we implement, in addition to general cleaning; Protective cleaning is carried out to prevent the bacteria that are carried from one place to another by people during the day from passing back to people.

In this context, for example, we disinfect the buses of IETT, the public transportation system that carries the most passengers in Turkey, every day. Because proper cleaning of public transportation vehicles is very important for public health. This is especially essential in large metropolises such as Istanbul.

Today, Wilco Group is responsible for the interior and exterior cleaning of 3 thousand IETT buses in Istanbul. This cleaning is not done by ordinary or traditional methods. It is carried out by Wilco's specially trained personnel and using the latest hygiene technologies. Moreover, in this regard, attention is paid to the use of substances that do not harm human health.

Industrial Supply Services

Industrial supply is a series of functions and specific tasks in delivering products from the supplier to the end user by integrating all the functions that make up the chain; It fulfills its goals in line with 6 basic goals.

Advantages You Will Gain:

- * Improves delivery performance.
- * It enables the reduction of inventory.
- * Increases order fulfillment rate.
- * It increases the accuracy of demand forecasts.
- * It shortens the supply cycle time.
- * Reduces logistics costs.
- * It provides increased efficiency and capacity.
- * It increases customer satisfaction.
- * It ensures production continuity by guaranteeing the supply of inputs.
- * It increases quality by meeting consumer demands in the best way possible.
- * Reduces total costs.
- * It allows you to respond to changes in the market in a shorter time.

* Demand and order management

* Purchasing

* Planning

* Inventory (Stock Management)

* Warehouse Management

* Shipment (Transportation)

Payroll Service

If you outsource the payroll process, your company will be more comfortable in optimizing your business operations by focusing on your core business. As experts in the field, we undertake the labor and cost-intensive personnel payroll process by adhering to legal regulations.

Services

- Monthly salary and wage calculations
- Payment of taxes and deductions
- Personnel regulations, entry and exit procedures
- Payment of salaries and wages
- Reporting service.

Benefits of your payroll support to your company:

- Focus on your core business
- Relieving your administrative workload
- Full compliance with legal process
- Providing cost advantage
- Productivity

Industrial Cleaning Chemicals

We supply products for you that ensure the best hygiene and cleaning results by considering efficiency and performance, both environmentally and user-friendly.

Industrial Consumables

We provide you with the supply of all kinds of consumables and tools that are consumed as a result of continuous use and that you can think of. Thus, you do not need to contact separate companies, get prices and make a choice for each equipment. Only when you work with us, we regularly provide you with these needs at better prices and with a richer product selection.

Working with us naturally allows your company to deal with a single person, thus saving time, money and personnel. Our goal is for you to benefit from this relationship and be satisfied with our service.

Disinfection Products and Service

In disinfection services, the chemical substance used to kill microorganisms on inanimate objects, the substance that kills pathogenic factors, is the process of killing or stopping the reproduction of pathogenic microorganisms other than bacterial endospores in the inanimate environment. For this purpose, we eliminate disease agents and provide a healthy, germ-free and hygienic environment for you with chemical substances that kill microbes, which are not used for living things but are used for devices and materials.

Operating room, intensive care, laboratory, office, home, bank, workplace, etc. It is used as hand disinfectant in all areas, as well as for floor and surface disinfection. It can be used with wiping or disinfection machines.

– We are a corporate company that provides insect and rodent disinfestation and disinfectant application services in all 81 provinces of Turkey.

Our references include private and public banks, courthouses, prisons, schools affiliated with national education, intercity and private public buses, gyms affiliated with the Ministry of Sports, private and public workplaces, and home disinfectant services.

Auxiliary Personnel Service

In today's business world, flexibility in the field of personnel is an indispensable condition. Temporary personnel requirements arising from the needs of public institutions and private organizations create great organizational and cost difficulties for businesses.

Wilco has experience and strengths in the field of personnel employment. It eliminates the huge workload on its customers with its organizational structure. aims to remove it. Wilco, which has the power to provide services throughout the country, can offer employment and personnel support in many different areas. Supported areas and sectors may vary depending on your request.
